SYSTEM-WIDE RENEWAL/ADAPTION

Description of Project

The residence hall capital repair projects listed in this request are integral with the multi-year, system-wide facility renewal program of the Authority. The goal of this program is to establish and to sustain quality residence life facilities for all students at the nine state university campuses, regardless of the age of the structure. Since its inception in 2000, this program has resulted in the investment of over \$186 million in the existing campus housing facilities. In addition to the repair and replacement of building systems and components (roofs, windows, and doors; electrical, plumbing, and heating; and interior finishes) this program has funded the removal of hazardous materials and the installation of fire alarm systems, sprinklers, and elevators. The recommended projects are consistent with the facility renewal plan, and have been reviewed and approved by the Board of the Authority.

Project Overview

- Funding for next phases of on-going residence hall capital renewal and adaption projects at Bridgewater State, Fitchburg State, Massachusetts College of Liberal Arts, Salem State, and Westfield State
- Buildings built between 1900 and 1990.
- Scope of work includes fire protection; bathroom renovations; mechanical, electrical, and plumbing system upgrades; window replacement; and interior finish renewal.
- Construction required to accommodate student occupancy at 100 percent without loss of revenue, primarily during summers and vacation periods.
- Combined with debt service savings achieved on the 2009B/C repair bond issue, a 1% rent increase will generate sufficient revenue for repair debt service.
