

Advanced Placement

Project Description

Advanced Placement - this initiative was created to drive a school culture of high expectations by dramatically increasing participation and performance in advanced placement courses, particularly among underserved populations, to prepare students for college and career success in science, technology, engineering, and mathematics (STEM).

Mass Insight, the administrator of this program, focuses on three measurable goals: 1) Increase AP participation, 2) Increase AP performance and 3) Increase College Success. Mass Insight is currently working directly with over 8,000 students in 64 high schools across the Commonwealth.
