

# STEM Pathways Project

## Project Description

---

**STEM Pathways Project (SSPP)** - promotes student success with the goal to increase graduation rates by providing strategic and successful initiatives which address students' academic, experiential, and career awareness interests. MCLA's SSPP employs a STEM retention plan, starting with activities for freshman and continuing through senior year. Administered through the MCLA Center for Student Success and Engagement (CSSE), the program delivers enhanced academic support, advising, and career planning, and marshals the efforts of both the academic affairs and student affairs divisions.
